

GLASS SCIENCE®

Glass Shield Protective Coating & Repellent

New, Glass Shield® was developed by the Inventor of the Original Rain-X®. It is guaranteed to be the best performing glass coating & repellent or your money back.

Glass Shield makes rain, sleet & snow “bead” into small droplets, which are removed by aerodynamic wind flow for improved visibility, safety & driving comfort. It also reduces the adhesion & buildup of frost, snow, ice, salt, mud, bugs & grime for easy removal. *Glass Shield increases scratch & chip resistance up to 92.9% to reduce the need for windshield replacement. Nano-tech coated glass is 23% more resistant to wear.

Available in 10 fl oz

PRODUCT FEATURES:

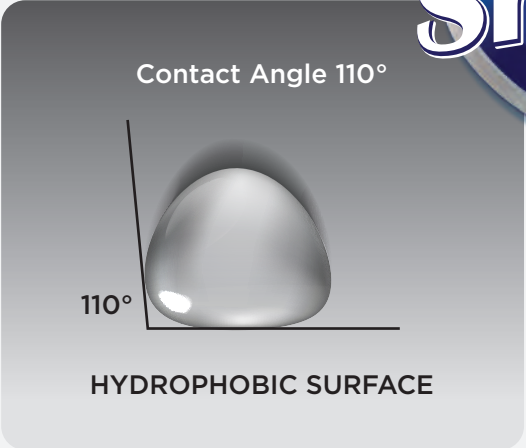

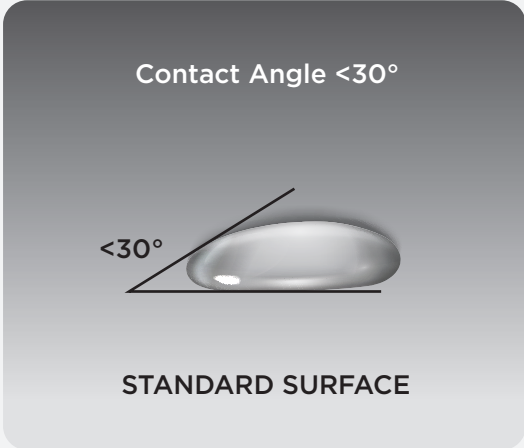

- Repels Rain, Sleet, Frost, Snow, Ice & Bugs
- Improves Visibility, Driving Safety & Appearance
- Reduces Scratches, Chips & Pitting*

In tests conducted by a major United States University, better visibility improved driving response time up to a full second or more. At highway speeds, that’s almost four car lengths of extra stopping distance!

Contact Angle is Key!

PRODUCT USE:

Wash before initial use and dry surfaces. Ensure no residue is left behind.

- (1) Apply liberal amount of Glass Shield to a folded cloth, microfiber or paper towel.
- (2) Using a circular motion, polish Glass Shield into the surface until smooth and slight haze forms. Let dry for a minute or two. Repeat application to ensure complete coverage.
- (3) Remove final haze by polishing with a soft cloth or by spraying the surface with water and wiping until crystal clear.
- (4) For optimum visibility, reapply as needed and use wipers as necessary.

USES FOR GLASS SHIELD PROTECTIVE COATING & REPELLENT

For over 40 years, Unelko has been a leader in advanced surface cleaning & coating technologies within the automotive, shower door and kitchen & bath markets.
